Summary

Security and privacy focused Ai solutions and Modern Workspace consultant with 10+ years of experience in aligning technical and security expertise with business needs. Expert in Microsoft Intune, Windows 10/11, Exchange Online, Teams, SharePoint, OneDrive, and Microsoft Defender XDR. Successfully enabled organizations to increase their Secure Score by at least 35% - 60% while reducing operational costs by a minimum of 25% to 30% through consultation and implementation of cost-efficient solutions that maintain business objectives and security standards. Strong track record in end-to-end IT Solutions and project delivery.

Projects Delivered - Designed, planned implemented and continually maintained and improved

- Microsoft Global Secure Access – VPN Replacement
- XDR Implementation – Defender Security
- MS Intune MDM / MAM Design and Deployment
- VMware to Proxmox Migration
- Exchange Server Migration Projects
- ESET to Microsoft Defender for Endpoint Migration
- Defender for Cloud Apps (CASB) Deployment
- Microsoft Purview Implementation
- ADFS Implementation
- Zero trust assessment and security hardening

Work Experience

ESMT GmbH, Berlin, DE **Jul 2023 – Present**

Microsoft Systems Administrator

Administering and continuously enhancing the Microsoft 365 and hybrid ecosystem, including on-premises server infrastructure, endpoint security, identity, and collaboration services.

- Delivered seven major IT and security projects over three years, significantly improving overall IT landscape and security posture
- Manage the full M365 suite: Intune, Exchange Online, Teams, SharePoint, OneDrive, and Defender XDR
- Managed Windows Server and Windows 10/11 clients; security baselines, and patching
- Owned MDM lifecycle for Windows, macOS, iOS, and Android; maintained Zero Trust and conditional access
- Improved system health and security posture by 50%; produced reports for management

Information Security Coordinator

Coordinating Information Security governance across the organization, overseeing risk, compliance, and security posture management

- Conducting access control reviews, security audits, and supporting incident response planning
- Supporting risk assessments, vulnerability mitigation, and contribution to security policy development
- Managing vendor security reviews, data protection assessments, and awareness training

INFARM - Indoor Urban Farming GmbH, Berlin, DE **Jul 2022 – Jun 2023**

IT Administrator – Systems

Administered IT systems and managed cloud services for 1,000+ local and international users, with a strong focus on IAM and security improvement.

- Managed Azure AD, Google workspace and Intune MDM for 1,000+ devices
- Handled onboarding/offboarding, hardware inventory, software licensing, and cross-departmental ERP project

MicroChannel Private Limited, Australia **Oct 2018 – Jun 2022**

Senior Consultant – IT Systems

Served as an IT Systems Consultant within an MSP, administering IT systems and providing Tier 3 support for 300+ users across client environments, with the organization supporting 1,400+ clients across seven offices in Australia and the Asia-Pacific region.

- Delivered Microsoft 365, Azure, Intune MDM, and hybrid Exchange projects
- Deployed DNS, DHCP, ADFS, RRAS, NPS, and Fiber Channel SAN; managed OS patching and update cycles
- Evaluated and migrated legacy systems to cloud services and provided continued Level 3 support
- Mentored junior engineers; maintained knowledge base, network diagrams, and change logs

Involve 360 (Pvt) Ltd, LK | Inbay Ltd – UK **Aug 2016 – Oct 2018**
